Omeed Lodin

Ajax, ON | 289-600-4349 | omeed_lodin@live.com | linkedin.com/in/omeed-lodin | github.com/OmeedLodin | omeedlodin.github.io

Physics & Astronomy student (B.Sc., York University, 2027) seeking an entry-level **quantum or photonics lab**, **optical test**, or **scientific instrument technician** role. Coursework in **optics and spectra**, modern physics, electromagnetics, and quantum mechanics. Hands-on **lab experience**: set up and ran experiments, followed **laser, radiation, and chemical safety** procedures, recorded measurements in a lab notebook, and wrote formal reports with **uncertainty analysis**. Analyzes data in **Python** on **Linux**; careful with fine assembly and repetitive testing. **Eligible for Canadian security clearance**; open to relocation and shift work.

Education

York University — Sept. 2022 – Exp. 2027
B.Sc. Physics & Astronomy — *Toronto, ON*

- **Physics & Optics:** Optics & Spectra, Modern Physics, Electromagnetics I, Statistical & Thermal Physics, Relativity & Modern Physics; Quantum Mechanics (Winter 2027)
- **Lab & Data:** Experiments in Modern Physics, Experimental Physics with Data Analysis, Computational Methods for Physicists; Practical Data Science Methods in Physical Sciences (Winter 2027)
- Ian and Dorothy MacDonald Award; **Top 10 of 150**, Physics Experiment Poster Challenge (2024); Ontario Scholar (96% average)

Skills

Lab & Measurement:	Experiment setup, measurement and data collection, lab notebooks, uncertainty analysis and curve fitting, following lab procedures, formal technical reports
Instruments & Tools:	Oscilloscope, multimeter, DC power supply, soldering iron; torque wrench and hand tools; OBD-II diagnostics
Safety:	Laser, radiation, and chemical lab safety; sealed radioactive source handling; WHMIS; electrical isolation
Software & Data:	Python (NumPy, Pandas, Matplotlib, scikit-learn), C/C++, MATLAB, Linux command line, Git/GitHub, DS9, IRAF, Excel
Other:	Eligible for Canadian security clearance; Full G licence (Ontario); English, Farsi, Dari (fluent)

Lab Work & Technical Projects

Experimental Physics Labs | York University — 2022 – Present

- Set up and ran **Rutherford scattering** (sealed radioactive source), **Millikan oil drop**, and **Cavendish torsion balance** experiments
- Followed radiation, laser, and chemical safety procedures; kept a lab notebook; wrote formal reports with uncertainty propagation and curve fitting

Galactic Observation & Data Analysis (PGC-70419) | Python, DS9, IRAF — Dec. 2023

- Processed CCD imaging data from York's observatory telescope to measure the galaxy's nucleus; wrote a formal technical report

Custom PC Building | Side business — 2019 – 2024

- Built **20+** custom PCs: selected compatible parts, assembled and wired them, installed OS and drivers, and stress-tested each

Engine Rebuild & Maintenance | 2017 Audi A4, 2.0L turbocharged inline-4 — Ongoing

- Rebuilt the engine to service-manual procedures, torquing to spec and isolating the battery first; **100,000+ km** since

Work Experience

Computer Forensics Intern — Summer 2026
KlueTek (Individual & Corporate IT Solutions) — *Toronto, ON*

- Ran forensic triage scripts on compromised client devices to find the root cause; kept devices and records secure and accurate

Business Development Manager — May 2025 – May 2026
Loopr Marketing (Video Games Industry Marketing) — *Toronto/Montreal, ON*

- Generated **15+ qualified leads per week** against a 10-lead target; tracked contacts and follow-ups in a spreadsheet log

Sales Representative — Aug. 2023 – May 2025
ASR Building Supplies (Construction Supply Company) — *Mississauga, ON*

- Served contractors at a high-volume counter; cut deal-closing time by roughly **30%** through dedicated closing meetings

IT Support Specialist — June 2022 – Aug. 2023
KlueTek (Individual & Corporate IT Solutions) — *Toronto, ON*

- Supported **50+** clients; diagnosed hardware/software faults and swapped HDD/SSD, RAM, GPU, and PSU components
