Physics & Astronomy student at York University with hands-on experience in client-facing sales/outreach, IT support, and independent data analysis work in Python. Comfortable working directly with clients while developing technical skills in data cleaning, exploratory analysis, and statistical modeling through ongoing coursework and personal projects.

EDUCATION

York University, Toronto, ON

Sept. 2022 – Apr. 2027

B.Sc. Physics & Astronomy (Specialized Honours)

- Relevant Coursework: Statistics, Data Analysis, Computational Methods, Programming, Calculus I–V
- Completed projects involving end-to-end analytical workflows, including data collection, cleaning, validation, analysis, and reporting

SKILLS

Technical: Python (Pandas, NumPy, scikit-learn), Excel, SQL

Data & Analytics: Exploratory Data Analysis, Data Cleaning, Correlation & Feature Analysis, Data Visualization

Client & Sales: Cold Outreach, Needs Assessment, Relationship Management, Deal Closing

Other: Google Ads, Basic Web Edits, Hardware Repair (HDD/SSD swaps), Remote IT Support, Forensic Triage

EXPERIENCE

Computer Forensics Intern

May 2026 – Present

BlueTek (Contract – Murray Hill Partners)

Toronto, ON

- Meet with clients to intake compromised systems, walking through and signing preliminary engagement documentation
- Collect compromised devices and run forensic triage scripts to help identify likely sources of compromise, supporting the forensics team on active client cases

Business Development Manager

May 2025 – Present

Loopr Marketing (Video Games Industry Marketing)

Toronto/Montreal, ON

- Generate 15+ qualified leads weekly (vs. a 10-lead team target) by prospecting game studios, developers, and product creators through industry expos and direct LinkedIn outreach
- Pitch and sell marketing/PR services via cold outreach, calls, and email follow-up, managing the sales cycle from first contact through close
- Track outreach contacts, responses, and follow-up status in a structured spreadsheet log to keep the pipeline organized

Sales Representative

Aug. 2023 – May 2025

ASR Building Supplies (Construction Supply)

Mississauga, ON

- Handled daily B2B contractor orders alongside a team walk-in average of 10 large orders/day
- Proactively targeted contractors purchasing from big-box retailers (e.g., Home Depot) to pitch ASR as an alternative supplier, winning new accounts
- Ran deal-closing meetings with contractors, cutting average time from first conversation to finalized deal by roughly 30%

IT Support Specialist

Jun. 2022 – Aug. 2023

BlueTek (Individual & Corporate IT Solutions)

Toronto, ON

- Supported roughly 50–60 individual and corporate clients with front-desk and remote troubleshooting
- Performed hands-on hardware repairs, including HDD/SSD swaps and other component-level fixes
- Built and maintained client websites and ran Google Ads campaigns to support client acquisition

PROJECTS

Stellar Classification (In Progress) — Python, Pandas, scikit-learn

- Collaborating with one other contributor to build a 3-class classifier (STAR/GALAXY/QSO) on SDSS DR18 photometric survey data
- Completed data cleaning, class-distribution analysis, and a correlation heatmap to guide feature selection
- Built an initial logistic regression baseline (train/test split, scaling, classification report); currently addressing class imbalance and extending to additional models

Galactic Observation & Data Analysis (PGC-70419) — Python, DS9, IRAF

Dec. 2023

- Pulled and analyzed observational data for galaxy PGC-70419 to measure properties of its nucleus
- Produced a formal written report on methodology and findings

LEADERSHIP & ACHIEVEMENTS

Physics Experiment Poster Challenge (Top 10/150)

Apr. 2024

- Ranked Top 10 out of 150 students for presenting a data-driven physics research project and effectively communicating analytical findings

Computer Science Club Co-Founder

- Co-founded and organized a student-led initiative focused on programming, technical collaboration, and structured problem solving
