Physics & Astronomy student (B.Sc., York University, 2027) seeking an entry-level **space hardware**, **satellite operations**, or **integration and test** role. Coursework in **remote sensing**, astronomical techniques, electromagnetics, and optics. Hands-on **hardware assembly, troubleshooting, and testing** from 20+ custom PC builds, component-level repairs, and a full engine rebuild to service-manual procedures. Programs in **Python, C/C++, and MATLAB** on **Linux**; follows procedures, keeps accurate records, and writes technical reports. **Eligible for Canadian security clearance**; open to relocation, travel, and shift work.

Education

York University Sept. 2022 – Exp. 2027
B.Sc. Physics & Astronomy (Astronomy & Astrophysics stream) *Toronto, ON*

- **Space & Astronomy:** Remote Sensing of the Earth's Surface (in progress), Astronomical Techniques (in progress), Galaxies & the Universe, Fundamentals of Astronomy
- **Physics & Lab:** Electromagnetics I, Optics & Spectra, Classical Mechanics, Experiments in Modern Physics, Experimental Physics with Data Analysis, Computational Methods for Physicists
- Ian and Dorothy MacDonald Award; **Top 10 of 150**, Physics Experiment Poster Challenge (2024); Ontario Scholar (96% average)

Skills

Hardware & Test: Hardware assembly and integration, functional and stress testing, inspection, troubleshooting and root-cause diagnosis, component-level repair, torque-to-spec assembly
Lab & Electrical: Oscilloscope, multimeter, DC power supply, soldering iron; electrical isolation before work; radiation, laser, and chemical lab safety; WHMIS
Software & Data: Python (NumPy, Pandas, Matplotlib, scikit-learn), C/C++, MATLAB, Linux command line, Git/GitHub, DS9, IRAF, Microsoft Office (Excel)
Documentation: Following procedures (service manuals, lab safety), service records, lab notebooks, formal technical reports
Other: Eligible for Canadian security clearance; Full G licence (Ontario); English, Farsi, Dari (fluent)

Technical Projects & Labs

Galactic Observation & Data Analysis (PGC-70419) | Python, DS9, IRAF Dec. 2023

- Processed CCD imaging data from York's observatory telescope to measure the galaxy's nucleus; wrote a formal technical report

Experimental Physics Labs | York University 2022 – Present

- Set up and ran Rutherford scattering (sealed radioactive source), Millikan oil drop, and Cavendish torsion balance experiments
- Followed radiation, laser, and chemical safety procedures; kept a lab notebook; reported results with uncertainty analysis

Custom PC Building | Side business 2019 – 2024

- Built **20+** custom PCs: selected compatible components, assembled and wired them, installed OS and drivers
- Stress-tested and checked temperatures on every build before handoff

Engine Rebuild & Maintenance | 2017 Audi A4, 2.0L turbocharged inline-4 Ongoing

- Rebuilt the engine to service-manual procedures (coolant leaks, gaskets, timing chain, carbon buildup); **100,000+ km** since
- Inspect components, diagnose faults with an OBD-II scanner, torque to spec, and isolate the battery before electrical work

Work Experience

Computer Forensics Intern Summer 2026
KlueTek (Individual & Corporate IT Solutions) *Toronto, ON*

- Ran forensic triage scripts on compromised client devices to troubleshoot and identify the root cause of compromise
- Completed client intake and engagement documentation before work began; kept devices and records secure and accurate

Business Development Manager May 2025 – May 2026
Loopr Marketing (Video Games Industry Marketing) *Toronto/Montreal, ON*

- Generated **15+ qualified leads per week** against a 10-lead target; managed client communication through close

Sales Representative Aug. 2023 – May 2025
ASR Building Supplies (Construction Supply Company) *Mississauga, ON*

- Served contractors at a high-volume counter; cut deal-closing time by roughly **30%** through dedicated closing meetings

IT Support Specialist June 2022 – Aug. 2023
KlueTek (Individual & Corporate IT Solutions) *Toronto, ON*

- Supported **50+** clients in person and remotely, diagnosing and resolving hardware and software faults
- Performed component-level repairs and part swaps (HDD/SSD, RAM, GPU, PSU); kept accurate service records
