Omeed Lodin

Ajax, ON | 289-600-4349 | omeed_lodin@live.com | linkedin.com/in/omeed-lodin | github.com/OmeedLodin | omeedlodin.github.io

Physics & Astronomy student at York University looking for hands-on work in **nuclear operations**, **space hardware**, quantum and photonics labs, and technical test and repair. Coursework in **modern physics**, statistical and thermal physics, electromagnetics, and optics; programs in **Python, C/C++, and MATLAB** on **Linux**. Practiced **radiation safety** with a sealed lab source, rebuilt an engine to service-manual procedures, and writes formal technical reports. **Eligible for Canadian security clearance**.

Education

York University Sept. 2022 – Exp. 2027
B.Sc. Physics & Astronomy *Toronto, ON*

- **Physics:** Modern Physics, Statistical & Thermal Physics, Electromagnetics I, Optics & Spectra, Experiments in Modern Physics; Quantum Mechanics (Winter 2027)
- **Computing & Astronomy:** Computational Methods for Physicists, Experimental Physics with Data Analysis, Galaxies & the Universe; Remote Sensing of the Earth's Surface (in progress)
- Ian and Dorothy MacDonald Award; **Top 10 of 150**, Physics Experiment Poster Challenge (2024); Ontario Scholar (96% average)

Skills

Programming: Python (NumPy, Pandas, Matplotlib, scikit-learn), C/C++, MATLAB
Systems & Tools: Linux command line, Git/GitHub, Microsoft Office (Word, Excel, PowerPoint), DS9, IRAF
Lab & Electrical: Oscilloscope, multimeter, DC power supply, soldering iron; lab notebooks and formal reports
Safety: WHMIS; radiation, laser, and chemical lab safety; electrical isolation before work
Other: Eligible for Canadian security clearance; Full G licence (Ontario); English, Farsi, Dari (fluent)

Technical Projects & Labs

Experimental Physics Labs | York University 2022 – Present

- Set up and ran **Rutherford scattering** (sealed radioactive source), Millikan oil drop, and Cavendish torsion balance experiments
- Followed radiation, laser, and chemical safety procedures; recorded readings in a lab notebook and wrote formal reports

Galactic Observation & Data Analysis (PGC-70419) | Python, DS9, IRAF Dec. 2023

- Analyzed observational data from York's CCD telescope to measure properties of the nucleus of galaxy PGC-70419
- Wrote a formal technical report on the methodology, measurements, and findings

Stellar Classification (In Progress) | Python, Pandas, scikit-learn, Git 2026

- Building a 3-class classifier (star/galaxy/quasar) on SDSS DR18 survey data with one collaborator, version-controlled on GitHub
- Cleaned the data, analyzed class distribution and feature correlations, and built a logistic regression baseline

Engine Rebuild & Maintenance | 2017 Audi A4, 2.0L turbocharged inline-4 Ongoing

- Rebuilt the engine to service-manual procedures (coolant leaks, gaskets, timing chain, carbon buildup); **100,000+ km** since
- Diagnose faults with an OBD-II scanner, torque to spec, and isolate the battery before electrical or sensor work

Custom PC Building | Side business 2019 – 2024

- Built **20+** custom PCs for customers: picked compatible parts, assembled and wired them, installed OS and drivers; stress-tested and checked temperatures before handoff

Work Experience

Computer Forensics Intern Summer 2026
KlueTek (Individual & Corporate IT Solutions) *Toronto, ON*

- Ran forensic triage scripts on compromised client devices to troubleshoot and identify the source of compromise
- Met with clients to complete intake and preliminary engagement documentation, keeping records accurate and confidential

Business Development Manager May 2025 – May 2026
Loopr Marketing (Video Games Industry Marketing) *Toronto/Montreal, ON*

- Generated **15+ qualified leads per week** against a 10-lead team target; tracked contacts and follow-ups in a spreadsheet log

Sales Representative Aug. 2023 – May 2025
ASR Building Supplies (Construction Supply Company) *Mississauga, ON*

- Served contractors at a high-volume counter; cut deal-closing time by roughly **30%** through dedicated closing meetings

IT Support Specialist June 2022 – Aug. 2023
KlueTek (Individual & Corporate IT Solutions) *Toronto, ON*

- Supported **50+** clients in person and remotely, troubleshooting and resolving hardware and software faults
- Performed component-level repairs and part swaps (HDD/SSD, RAM, GPU, PSU); kept accurate service records
